How many college credits can a student earn?

Students can earn a maximum of 30 college semester credit hours per year and a maximum of 120 college semester credits prior to their high school graduation. The Ohio Board of Regents has established a formula that students must refer to when registering for high school and college courses. This formula is utilized to assure students do not exceed full-time status. Full-time status can be calculated as follows:

1. Determine student’s number of high school ONLY credits,
2. Multiply that number by 3, and
3. Subtract the result from the number 30
4. That number is the total number of college credits that College Credit Plus students may earn that academic year.

- Any college course taken during the summer will count towards the 30 credit limit in the following school year.

Transfer of Credits/Transcripts:

Credits earned through College Credit Plus are transferable to many public and private institutions in Ohio and out of the state. Students who want to transfer to another university will need to send their transcript from the Institute of Higher Learning (IHL) to the university they plan to attend. Many of these courses apply towards the general education requirement or as electives at that school. Two websites are available to help students fully understand what courses will transfer: www.collegetransfer.net or www.ohiohighered.org/transfer

How will College Credit Plus courses impact my GPA?

Per HB 487, College Credit Plus courses must receive the equivalent weight as any weighted course within a given content area. Therefore, College Credit Plus courses are weighted on a 4.8 scale. Students' final grades will be converted to the Upper Arlington Schools approved grading scale; however, the college will impose their own grading scale that is approved by the university.
