QUALITY PROFILE
2017-2018

www.uaschools.org
1950 North Mallway Drive
Upper Arlington, Ohio 43221
(614) 487-5000
The document you are reading is the Quality Profile, an accountability report designed to give our community a transparent view of our district’s strengths and areas of need. It aligns with the five goals in our 2015-2018 Strategic Plan — performance, personalization, accountability, efficiency and ownership.

We believe it is critically important to provide our community with tools to measure our progress toward fulfilling these important goals.

As we approach the end of the 2015-2018 Strategic Plan, we celebrate the positive impact the plan has had on students and our community while also looking toward the future and our next strategic plan.

During the current school year, staff and community members will work together to create the new 2019-2022 Strategic Plan. We will set goals that support our position as a national leader in education and continue our focus on challenging and supporting every student every step of the way.

If you have any questions or suggestions about this document or our schools, please feel free to contact me at (614) 487-5030 or superintendent@uaschools.org.

Sincerely,

Paul Imhoff, Ed.D.
Superintendent, Upper Arlington Schools
**THE GOALS**

1. **PERFORMANCE**
   All Upper Arlington students attain academic excellence.

2. **PERSONALIZATION**
   All Upper Arlington students experience a personalized learning environment to support their success.

3. **ACCOUNTABILITY**
   The Upper Arlington Quality Profile provides a transparent, sensible and reliable accountability framework.

4. **EFFICIENCY**
   Upper Arlington Schools manages resources efficiently and effectively.

5. **OWNERSHIP**
   Upper Arlington Schools uses clear, honest, open and interactive communication to build ownership of the strategic plan.

---

**2015-2018 STRATEGIC PLAN: OUR ROADMAP FOR THE FUTURE**

As Upper Arlington Schools begins its second century, it’s clear that the community feels strongly about providing children the highest quality education possible. It’s also clear that swiftly changing economic, social and technological conditions are shaping the future for students. For Upper Arlington’s schools to stay on the leading edge, we must have a keen focus on what matters most for students and the community. The 2015-2018 Strategic Plan provides that focus and new mission and vision statements to reflect the district’s commitment.

---

</table>

*Similar districts are defined based on the Ohio Department of Education’s similar districts tool and may vary from year to year. To access the similar districts tool, please visit http://webapp2.ode.state.oh.us/similar_districts.

### BEHIND THE NUMBERS

The most recent four-year graduation rate represents the percentage of students who entered ninth grade in the fall of 2013 and graduated by 2017. This figure is adjusted to include students who transferred into the Upper Arlington High School Class of 2017 after 2013 and those who transferred to another school prior to graduation in 2017. The Ohio Department of Education reports four-year graduation rates on a one-year lag to include summer graduates.

### OUR GOAL

Although the current four-year graduation rate is commendable, Upper Arlington Schools continually strives to reach 100 percent. Our teachers, counselors and administrators work to build relationships with students and personalize their educational experiences to fit their needs as students and as young adults.
BEHIND THE NUMBERS

The data above represent the percentage of Upper Arlington’s third-graders who scored proficient or better on the state reading test during each of the past three school years. The State Grade 3 English Language Arts Test is given in both the fall and the spring. Ohio’s third-grade reading guarantee states that students who do not meet the third grade promotion score during either administration of the test are subject to retention in third grade unless they can demonstrate proficiency on another state-approved test or they have exempted status. All students met one or more of these benchmarks during 2017-2018 to advance to fourth grade.

OUR GOAL

Upper Arlington Schools believes that early literacy skills are the foundation of a positive educational experience. Our goal is to ensure that 100 percent of students are performing at or above the proficient level. Our schools are focused on continuously improving and personalizing literacy instruction for all students. Teachers will continue to use the STAR system, a nationally normed progress monitoring tool, to regularly track each student’s proficiency in different areas of literacy, better enabling them to tailor their instruction to the needs of the student.
The ACT is a national college admissions examination that consists of subject-area tests in English, mathematics, reading and science. The composite score is the average of a student’s scores on the four subject-area tests. The highest possible composite score is 36.

BEHIND THE NUMBERS

The average ACT composite score for Upper Arlington students far exceeds the state and national averages. All Upper Arlington High School juniors now take the ACT, and we are pleased to see above-average scores as the testing pool has increased.
The SAT is a national college admissions examination designed to measure how much students know, and how well they can apply their knowledge of reading, writing and math. The highest possible total score for the new SAT administered to the Classes of 2017 and 2018 is 1600. The highest possible total score for the SAT administered to the Class of 2016 was 2400.

The average SAT score for Upper Arlington students far exceeds the state and national averages. Our goal is to continue to support students to achieve above-average scores on this important college entrance exam.
### AP/IB Enrollment and Test Passage Rate

<table>
<thead>
<tr>

<td>454</td>
</tr>
<tr>
<td><strong>Test Passage Rate</strong></td>
<td><strong>79%</strong></td>
<td><strong>81%</strong></td>
<td><strong>84%</strong></td>
</tr>
</tbody>
</table>

### Behind the Numbers

Advanced Placement and International Baccalaureate classes offer students the opportunity to experience college-level coursework during high school. Having AP or IB credit on a high school transcript demonstrates an academically rigorous high school experience to college admissions staff members. In addition, students have the opportunity to earn college credit by taking AP and IB exams at the end of these courses.

### Our Goal

Upper Arlington Schools will continue to encourage students to experience college-level coursework during their high school years through AP and/or IB classes. College Credit Plus (CCP) is another opportunity for Upper Arlington High School students. CCP is a program that gives high school students an opportunity to be enrolled in both high school and college coursework at the same time. The credits earned are guaranteed to transfer to any public university in Ohio. For the 2017-2018 school year, Upper Arlington High School saw 142 enrollments in CCP courses through Columbus State Community College and the rigorous Ohio State University Academy. Ninety-five percent of those enrollments resulted in earned college credit.
These college course remediation rates are prepared by the Ohio Board of Regents and represent the number of students in the Upper Arlington High School Classes of 2015, 2016 and 2017 who entered a public Ohio college or university and had to take a developmental math class or a developmental English class in their first year of college. Students who enroll in private or out-of-state colleges and universities are not represented in this data.

While Upper Arlington’s in-state remediation rate is better than the state average and on par with or better than those of similar districts, our goal is to ensure that all students are prepared to enter on-level when they arrive at college. Upper Arlington students have long benefited from the high expectations of their teachers and the preparation provided by taking college-level Advanced Placement and International Baccalaureate classes. Students also have the option of taking College Credit Plus classes, an additional opportunity to experience college-level coursework in high school and help prepare them for success after graduation.
**Performance Indicator 7 | College/Career Readiness**

### PSAT College Readiness

</tr>
<tr>
<td>2015-2016</td>
<td>85%</td>
<td>57%</td>
<td>48%</td>
</tr>
</tbody>
</table>

### Behind the Numbers

The Preliminary Scholastic Aptitude Test (PSAT)/National Merit Scholarship Qualifying Test (NMSQT) College and Career Readiness Benchmarks represent the scores that a student should meet or exceed to be considered on track to be college and career ready. During the 2017-2018 school year, Upper Arlington Schools provided the PSAT/NMSQT to approximately 400 high school juniors, and 77 percent reached those benchmarks.

### Our Goal

Upper Arlington Schools will continue to provide the PSAT/NMSQT to all juniors as a way of gauging college and career readiness as well as entrance into the National Merit Scholarship program. Students will have the opportunity to review their scores with the college counselor to better understand the relationship to college and career readiness. Our goal is to have 80 percent of juniors reach these benchmarks, and we will strive to again meet or exceed that goal in 2018-2019.
BEHIND THE NUMBERS

The Performance Index (PI) measures the achievement of every student on state assessments, regardless of his or her level of proficiency. Schools receive points for every level of achievement, with more points being awarded for higher passing scores. The maximum PI is 120. Currently the Ohio Department of Education counts each student who opts out of taking a state assessment as earning a zero and failing. This inaccurate reporting has led to artificially low PI scores for many districts across the state. If the Performance Index accurately reflected the performance of the students who took the assessment, Upper Arlington would have a 102.6 for the 2017-2018 school year.

OUR GOAL

Upper Arlington Schools knows our students are more than a simple test score. Students have well-rounded experiences in our schools with an emphasis on the arts, wellness and core subject areas. Our district Performance Index represents the fact that our well-rounded students are also prepared for state standardized tests but continues to be impacted by the state’s policy of counting students who opt out of the state assessments against their home district’s PI score.

In an effort to provide our community with a clearer measure of the achievement of our students, we will continue to advocate for the state to report an accurate Performance Index score based solely upon the pool of test takers.
BEHIND THE NUMBERS

In order to truly understand how well an Upper Arlington education is serving students, we must follow how our students fare once they leave Upper Arlington High School. This includes tracking how many of our students enroll in college either immediately or soon after graduation. The National Student Clearinghouse provides enrollment and graduation data for more than 3,600 colleges and universities across the nation. Clearinghouse participants represent 98 percent of all students in public and private U.S. institutions.

OUR GOAL

Upper Arlington Schools will continue to equip our students with the resources and skills to ensure that their next step after high school engages them and gets them started on the right path toward career.

<td>-</td>
</tr>
</tbody>
</table>

### BEHIND THE NUMBERS

While the data in Indicator 9 shows that the vast majority of UAHS graduates go on to college, it is also important to learn how many of those students earn a degree from a college or university. The National Student Clearinghouse provides enrollment and graduation data for more than 3,600 colleges and universities across the nation. Clearinghouse participants represent 98 percent of all students in public and private U.S. institutions. Understanding the path to a college degree is not a four-year process for every student, the data above reflects college graduation from four to six years after high school.

### OUR GOAL

Upper Arlington Schools will strive to ensure that every student leaves Upper Arlington High School with the knowledge and life skills necessary to successfully navigate college within the time frame that is right for them and their career path.
**DISTRICT VALUE-ADDED CALCULATION AND RANKING**

<table>
<thead>
<tr>

</tr>
<tr>
<td>2015-2016</td>
<td>6.3</td>
<td>150&lt;sup&gt;TH&lt;/sup&gt;</td>
</tr>
</tbody>
</table>

**BEHIND THE NUMBERS**

The value-added calculation uses student achievement data over time to measure the gains in learning that students make. It provides a way to measure the effect a school or teacher has on student academic performance over the course of a school year or another period of time. A gain index of zero indicates students achieved one year of growth in a year’s time. Anything above zero indicates students are making more than one year of progress in a year’s time.

**OUR GOAL**

Upper Arlington Schools will strive to ensure our students are making one year’s worth of growth in one year’s time. The 2017-2018 data shows we continue to exceed that goal.

BEHIND THE NUMBERS
Upper Arlington Schools believes in providing a well-rounded education. Students thrive when they have opportunities to explore their interests and pursue their passions. (Similar district data not available.)

OUR GOAL
Upper Arlington Schools will remain focused on providing a wide array of learning opportunities for students both during and after the traditional school day. Our goal is to ensure all students have access to activities that capture their interests and engage them in learning. In our continued work toward this goal, we have identified 1,630 middle school enrollments and 1,875 high school enrollments in sports and activities tracked through our student information system for the 2017-2018 school year. We are continuing to work to create a comprehensive system to identify students who have not found their special niche so that our staff may work with them and their families to find an activity that excites and engages the students.

### BEHIND THE NUMBERS

The personalization necessary to challenge and support every student, every step of the way demands that we are extremely thoughtful in how we organize learning and instructional time, talent and technology. The 2017-2018 school year was the second full year of our districtwide, K-12 one-to-one technology program, which provides students with one-to-one access to a technological device that appropriately supports and maximizes their learning. At the end of the school year, we implemented the Apple Learning Technologies Survey to gather baseline data on our one-to-one program. This survey for educators identifies five key elements of student learning and measures how frequently they are enhanced by technology in the classroom.

### OUR GOAL

Upper Arlington Schools wants to ensure that technology has a positive impact on learning outcomes for students. We will use the data gathered through this survey to inform professional learning for our teachers so that they are empowered with the skills needed to improve the educational experience for all Upper Arlington students through the use of one-to-one technology.

**BEHIND THE NUMBERS**

Upper Arlington Schools has a long history of focusing on the whole child. A commitment to service learning is a critical component of a well-rounded education. During the 2015-2016 school year, we implemented an annual survey of teachers to explore how many were able to incorporate service learning techniques into their instruction.

**OUR GOAL**

Upper Arlington Schools will continue to support service learning by providing professional development opportunities for teachers on service-learning techniques. We will also work to address any obstacles to implementing service learning techniques that were identified in the staff survey.

BEHIND THE NUMBERS

Upper Arlington Schools will not rest on its laurels. Our accountability comes down to how well we deliver on greater performance and personalization through prudent and productive expenditures of resources. We have established this Quality Profile document to provide a continual focus on the goals, achievement and performance of our district, and identify whether those measures meet or exceed the expectations of our students, parents, the community and state performance standards. One measure of the success of this communication will come through scientific survey data, such as the information above.

OUR GOAL

Upper Arlington Schools will strive to maintain a total positive rating of 90 percent or greater. The total positive rating in the 2018 community survey is within the margin of error. We will continue to update this data with the results of future surveys.
2017-2018 REVENUE SOURCES

BEHIND THE NUMBERS

This indicator is meant to measure the district’s reliance on different funding sources, including efforts to attract non-local tax dollars. The graph above excludes the one-time proceeds related to the sale of $230 million in bonds.

OUR GOAL

While Upper Arlington Schools and most similar districts in Ohio are heavily reliant on local property tax income, we are committed to seeking alternative funding sources whenever possible. That includes funds and in-kind donations from sources such as the Upper Arlington Education Foundation, PTO and booster groups and outside grants.

These amounts, which are rounded to the nearest dollar, include the portion the state pays directly for state credits such as Homestead (owner-occupied) and Rollback for levies passed before November 2013.

*These districts also collect income tax that is not included in the above amounts.

---

## Behind the Numbers

The school residential property tax rate per $100,000 of home valuation provides a clear way to compare what residents in different communities pay for their schools. This figure rises when communities approve school tax increases. The figure also decreases due to the effects of a state law known as House Bill 920, which caps the amount a school district can collect on any levy. As home values rise, the effective millage of the levy is rolled back to keep the total amount collected on the levy consistent.

## Our Goal

Upper Arlington Schools is committed to maintaining a school tax rate that is competitive in comparison with other central Ohio school districts.
**BEHIND THE NUMBERS**

The Ohio Department of Education’s expenditure per pupil calculation represents the total amount each district spends on administration, building operations, instruction, pupil support and staff support divided by the district’s average daily membership. The similar district average is calculated by ODE using the data from the 20 districts it determines to be most similar to Upper Arlington Schools each year.

**OUR GOAL**

Because Upper Arlington Schools has a long history of offering more programming than other Ohio school districts, our expenditure per pupil rate is, and likely will continue to be, higher than that of many other Ohio school districts. While we intend to continue offering its students a wide array of academic, co-curricular and extra-curricular programming, we are also committed to operating in a lean and efficient manner, cutting costs as appropriate without creating a negative impact on students’ educational experiences.

$4,200,000 OCT 2015

$4,700,000 IN SAVINGS*, OCTOBER 2016

* Savings equates to a cumulative reduction of forecasted costs associated with the January 2014 Five Year Forecast.

BEHIND THE NUMBERS

As part of the Efficiency Project, Upper Arlington Schools committed in 2013 to improve the bottom line by $4.5 million by the end of 2016-2017 without negatively impacting students’ educational experiences. The savings would be realized through the use of technology, creative thinking, partnerships and shared services.

OUR GOAL

By the end of October 2016, Upper Arlington Schools had exceeded the efficiency savings commitment. We will continue to seek out efficiency measures and cost-avoidance opportunities whenever possible.

ENROLLMENT GROWTH AND LONG-TERM PLANNING

Upper Arlington Schools remains one of the fastest-growing school districts in the state of Ohio. We are closely monitoring our growing enrollment through annual projection reports. As we plan for continued enrollment growth, we remain committed to managing our resources efficiently without negatively impacting students’ educational experiences.

BEHIND THE NUMBERS

The first phase of the facilities master plan was created through a two-and-a-half-year, community-driven process to address what had been identified as the greatest threat to the district’s long-term financial health: its aging school buildings. Since December of 2017, community members, staff members and students have come alongside the Upper Arlington Board of Education and design professionals to inform the design process for a new high school and five new or renovated elementary schools. From the outset, the board was committed to a community-based process, and one measure of the success of this process is the scientific survey data above.

OUR GOAL

The Board of Education will continue to engage the entire community and staff as we prepare for the first groundbreakings in the spring of 2019 and continue through the construction process.
MEASURING STAFF ENGAGEMENT

GALLUP EDUCATION DATABASE
GALLUP OVERALL DATABASE

BEHIND THE NUMBERS

This measure is included to assess how well the district is engaging and managing one of its most important resources — its staff members. Research indicates that teachers and other school staff members who find meaning and satisfaction in their work provide a more successful academic experience for students.

Upper Arlington Schools has been participating in the Gallup Q12 Employee Engagement Survey since the 2016-2017 school year. The above results reflect the overall Employee Engagement GrandMean, which is measured on a scale of 1 to 5. The results are compared to the 50th percentile scores for two Gallup Q12 databases. Approximately 700 staff members took the 2017-2018 survey, which resulted in an overall Employee Engagement GrandMean of 3.98 out of 5.

OUR GOAL

Upper Arlington Schools is pleased to see increased participation and an increase in the overall Employee Engagement GrandMean in the second year of administration. The Upper Arlington Education Association Communications Committee will continue to provide guidance on the administration of the Q12 survey, with the goal of all staff members participating in the survey and understanding its purpose.

BEHIND THE NUMBERS

All stakeholders need to have an understanding of our district’s road map for the future and its positive impact on students and our community. We actively strive to build awareness of our strategic plan and the work of our educators through communication. One measure of the success of this communication will come through scientific survey data, such as the information above.

OUR GOAL

Upper Arlington Schools will strive to maintain or improve this rating. We will continue to use this data to inform our communication strategies with families and the community.
